SELECTION

A petri dish containing a yellow agar medium with several small, circular bacterial colonies. To the left of the dish is a pile of fine, brown powder, likely a microbial culture or substrate.

SOURCING

A close-up photograph of vibrant green plant leaves, showing the intricate vein structure and a slight sheen on the surface.

SPECIFICATION

A person wearing safety goggles and a white lab coat is looking through the eyepiece of a microscope. Their hands are positioned near the objective lenses.

STANDARDIZATION

A detailed view of the objective lenses and eyepiece of a light microscope, showing the complex optical components.

SAFETY

A white laboratory rack containing several test tubes filled with a red liquid. The rack is placed on a surface, and the background is a neutral color.

SUBSTANTIATION

A data visualization featuring a blue bar chart and a line graph overlaid on a grid. The bar chart has several bars with numerical values: 180, 290, 200, 280, 15, and 360. The line graph shows a fluctuating trend across the same data points.

6S QUALITY PROCESS

SELECTION

Pharmanex works with experts around the world to gather both historical and new scientific insights about ingredients.

SOURCING

Once we select a material, our experts travel the globe to investigate potential commercial sources.

SPECIFICATION

We set strict specifications to provide a basis for active compounds, ingredients, and criteria for finished products.

STANDARDIZATION

Raw materials must meet our specifications to certify their readiness for product manufacturing. Once manufactured, our products are tested to meet their finished good specifications.

SAFETY

We adhere to high product safety standards by reviewing scientific literature and conducting standard safety studies.

SUBSTANTIATION

We take great care to ensure that our products and ingredients are not only safe, but effective.
